

I am in support of the WI No Call List as it stands. I get to choose what I watch or listen to on the radio or television at my convenience. I get to choose when I open my mail or throw it if it is junk mail. I get to choose to delete emails if I do not know who is sending them or if they are junk. Some of us have to answer the phone because of family health issues. Why should some business or its affiliates be able to phone me over and over again because I no longer want their product/service? I am smart enough, and others too, to figure out what is best or most economical for me and my family. Our personal lives do not need anymore interruptions other than family and friends. We need to have fun and rejuvenate in order to meet the pressures of our jobs and to be there for our families when illnesses happen. Not tied up on the phone listening to some sales pitch!
